

# Ceiling Batten Insulation

Mammoth ceiling batten insulation products are designed to support the thermal performance of skillion or truss ceilings.

Made of 100% polyester, Mammoth® Ceiling Batten Insulation is designed to support the thermal performance of skillion and truss roof spaces. Ceiling batten space is an ideal cavity to insulate:

- to reduce thermal bridging through your truss bottom chords or rafters, and
- as the space is easily accessible from underneath and usually an unused space.

We have two options available for ceiling batten spaces - a R1.0 blanket and R1.3 airway sections. Both require 45mm deep ceiling battens.

For ceilings with sufficient roof space there is the option of our [Mammoth Ceiling Blanket](#) or for new ceilings without a roof space there is the option of our [Mammoth Skillion Ceiling Sections](#).
